CAL Notes:

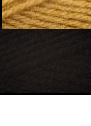

*Color amounts listed above only take into account the squares I will be working and the background colors I will be using. If you are going to use different background colors or any of the alternate squares, you may want to add up the number of skeins required by hand to make sure you have enough of the right colors.

**The values in this PDF chart for the number of skeins required is rounded to the nearest hundredth of a skein. If a value reads 0.00 on the chart, it means that there is only a small amount of yarn required for that color-- it does not mean that you don't need that color!
